Thank-you [REDACTED],

Really appreciate the turnaround on this and will get back to you as soon as possible.

Kind regards

[REDACTED]

Dear [REDACTED],

Find attached two files:

1. A word file with our first draft of the methods and results section. (you can ignore the first few grey pages if you like)
2. A spreadsheet you might find useful.

There are a number of minor changes [REDACTED] will be making to these sections, not to change the data but minor modifications to standardise graph axes, remove typos, make it a bit easier for readers to interpret, etc; we don't anticipate any changes to the figures themselves.

Note from [REDACTED] to [REDACTED]

I've left the KPIs as is for the moment in the main document, but I've created the attached spreadsheet which I suggest we send over as well, just as a visualisation of the KPIs for the meeting itself. The two things I'm most interested in their feedback on are:

- If they want any changes to the analyses and the ways they are presented.
- If there is anything that surprises them in the "summary of regression results" section that is worth me looking into further

[REDACTED] It would be great if you can respond by the middle of next week?

Best Wishes,

[REDACTED]
